TENETS OF INTERIOR DESIGN

- ◆ A beautiful room begins with proportion, balance, contrast, color, function and organization.
- ◆ One has to decide what should be kept, culled or hidden.
- ◆ Every room should have a focal point or interesting vignette.
- ◆ Art and accessories personalize a room the most.
- ◆ Appropriate lighting means both functional and ambient. Dimmer switches on all lighting.
- ◆ Good design is a combination of using both symmetrical and asymmetrical balance, as well as contrasting lights with darks.
- ◆ One should not be afraid of using oversized or larger scale furniture.
- ◆ Take an organic approach and bring the outside in. Plants and flowers are essential.
- ◆ Antiques give a room heritage.
- ◆ A mirror creates depth and illusion.
- ◆ A masculine or tailored look survives time more than a feminine one.
- ◆ An individual's personal touch adds graciousness and charm to a room or home.
- ◆ Celebrate every day, not just the seasons and holidays. Life is about the accumulation of good memories, not accumulating things.
